

DANIYELLA

THAT'S WHAT YOU DO

You had to learn the hard way what it means when they say
„Easy come, easy go“
That nothing lasts forever, you fell deep but never
Wasted any time with feeling low

You just turn the music louder, listen to a different song
If things are going wrong you will come on strong
,Cause....

**When your life has got you grounded you just set the world on fire
So you'll shine a light on every twist of fate
And you're taking every detour as a chance and with a smile
You won't turn around - no you won't beg down
That's what you do**

You've been many places, you played all your aces
Knowing life is not a deck of cards
And although yours was shattered it's the heart that matters
You may swing but never fall apart

You just turn the music louder, listen to a different song
If things are going wrong you will come on strong
,Cause....

CHORUS

You're the silver lining of any single cloud
Nothing's out of reach, nothing is too distant to achieve

CHORUS
